About me

I'm a Berlin-based first remote software engineer with a deep interest in advancing AI and data processing. My background in math, economics, and science has equipped me with the skills to tackle complex problems and bring ideas to life. I approach my work with the same dedication and discipline that I've applied to completing three Ironman races. I'm seeking a company that values creativity, quality, and teamwork, where I can contribute meaningfully whilst continuing to learn and grow.

Experience

Ovido Care / Fullstack Engineer

JUNE 2025 - DEC2025, REMOTE

Designed and developed a smart healthcare workforce-management prototype from the ground up, including shift scheduling, request, and booking workflows features.
Stack : Fastapi, Svelte, GCP, Postgres, Playwright, Logfire. ..

Corsearch / Software Engineer

MAY 2022 - APR 2024, REMOTE (BERLIN)

Python Engineer on backend using Django and FastAPI, developing features relative to brand protection, extending to topics like geolocation.

Klanik / Software Developer

MAY 2020 - MAY 2022, REMOTE (BERLIN)

Automation of disaster recovery procedures, with the creation of a runbook (sequence of executables) and features for backend and frontend (Vue.js)

Akka Tech / Graduate Engineer Programmer

MAY 2019 - MAY 2020, STUTTGART

- 'Scenario based testing' for autonomous driving
- Automation of the calibration process via Canbus and sensors

Contorion / Junior Software Developer

JUNE 2018 - MARCH 2019, BERLIN

- Web development with Django
- Web scraping with Scrapy

Education

MLOps / Datatalks

2024, REMOTE

Boot camp on MLOps - I learnt about best practices on developing an ML project, experiments tracking, models registering, pipelines orchestration and a final project

Freie Universität / Bachelor in Mathematics

2010 - 2014, BERLIN

Focus on stochastic methods my thesis was on 'Confjump' sampling method applied to small molecules

IFP School / Master in Energy Economics

2007-2008, PARIS

Focus in the oil industry, master thesis: heating oil and diesel fuel market analysis on the basis of JODI data

University of Paris I: -Sorbonne / Bachelor's Degree in Economics Paris

2006 - 2004

Focus on International Economy trades and exchanges

Languages

French (native), German (C1), English (C1), Spanish (A2)

Tech Stack and coding activities

Python Ecosystem:

Pure Python: very good command

Libraries used: Pandas, BeautifulSoup, Lxml, Plotly, Pymongo

Favorite Framework: Django, FastAPI, Scrappy, Carla simulator

Javascript Ecosystem:

JS: Vuetify, Bun, vite ...

Framework : Svelte, Vue.js, ElysiaJS

Database System:

Relational Model: , Postgres, Sqlite, Mysql

NoSQL: Cassandra, MongoDB, Elasticsearch, Neo4J

Data-ML Ops:

Kubernetes, Docker compose, MLflow, MageAI, Airflow

Some coding activities

Codewars: general level 4 Kyu, I currently focus on Javascript - [view my profile](#)

Hackerrank - [view my profile](#)

Hackathon Prize - [view my profile](#)
